

SUPER-POWERFUL, HIGH-CALCIUM LIQUID SUPPLEMENT.

POSSIBLY THE WORLD'S MOST POWERFUL, 100% ASSIMILATION FORM OF CALCIUM FROM ALL-ORGANIC PLANT & HERB SOURCES. THE GENIUS OF MOTHER NATURE.

Calcium is the most predominant mineral in the body and involved in every cellular activity from cancer-fighting and prevention to cardiovascular operation, fat burning, blood pressure regulation, blood clotting and of course, all bone, joint, cartilage and formation of bones and new bone growth. One of the greatest fallacies and health frauds perpetrated on the Western world is the mass propaganda from the dairy industry that milk and dairy products are the ultimate source of life-generating Calcium.

Actually, nothing could be further from the truth as the high acidic, animal-protein found in milk products leaches Calcium from the body as the body tries to overcome the acidity formed by milk and dairy, and return it to an alkaline state. (This is how antacid TUMS work). Mother Nature to the rescue with her arsenal of Calcium-rich herbs and plants. This extraordinary, all-liquid, all-herbal/plant source formulation delivers all the Calcium found in two glasses of milk IN JUST ONE TEASPOON!!!

INGREDIENTS: All organic Red Clover; Seaweed; Comfrey; Horsetail; Borage; Chamomile; Magnesium; Potassium; Zinc; Selenium; Vitamin C; Black Strap Molasses; Honey; Apple Cider Vinegar.

RED CLOVER: Also known as Meadow Trefoil, Cleaver Grass and Purple Clover. The ancient herbalists called it "Triphyloen" meaning "three leaves". Abundantly high in Calcium, Magnesium and Silica—all bone-building mineral elements necessary for strong bone growth, health and bone density. Similar to Alfalfa for its immense mineral richness and also used as a blood purifier, expelling toxins from the bloodstream. Red Clover also contains Vitamin A, Vitamin C, B-complex, Chromium, Iron and Lecithin.

SEAWEED: The sea vegetables Dulse, Laminara, Kelp and Kombu are smorgasbords of minerals and trace mineral elements. In particular, these vegetables contain very high amounts of high-assimilation (because of their ocean-source) Calcium, Potassium, Magnesium and Iodine. It is interesting that people who live by the sea rarely suffer bone disease or any form of Arthritis.

COMFREY: Also known as "Boneset" and used for hundreds and hundreds of years by European healers and herbalists. Extremely high in all the bone-formation and bone-growth minerals such as Calcium, Silica, Boron and Strontium. It has also been used with some relative success as a cancer treatment and preventative.

HORSETAIL: An abundantly-rich source of Silica, Calcium and Magnesium. Horsetail which is also known as "Shavegrass" produces rich hair, skin and nail growth in a very short period of time. This is attributed to the perfect balance of the Calcium to the Magnesium and Silica content and the 100% assimilation of these elements coming from a plant and herbal source.

BORAGE: Also known anecdotally as "the gladdening herb" for the way it "gladdens" the entire body. As a result, Borage has been used extensively for the treatment of manic depression and anxiety with considerable success. This is attributed to the high Calcium content. Calcium has very high regulatory effect on depression and lack of morale.

CHAMOMILE: Renowned as the "great relaxer", Chamomile has been used for centuries to calm the body, relieve anxiety and treat depression. It is similar in action to Borage which also is used for depression as the high Calcium content is needed by the central nervous system and the pituitary gland to control emotions.

MAGNESIUM: The "sister" mineral to Calcium. Without Magnesium, Calcium is worthless inside the body. This results in Calcium starvation by the bones as the Calcium stays "inert" and calcifies into hard, lumps and rocks in hands, feet, ankles and in the arteries. Magnesium also works with Potassium and Calcium to regulate each heartbeat.

POTASSIUM: Along with Calcium, Sodium and Magnesium this is one of the Major Minerals required by the body to operate. Potassium works with Sodium to create energy and also partners Magnesium in creating a heartbeat. Also necessary for mental clarity and cognitive functioning.

ZINC: The immune system mineral. Without Zinc, the body's thymus gland cannot manufacture vital T-cells, these are the "front line" of the body's immune system. Zinc is also needed for formation of insulin and to all sexual and reproductive help. It partners Calcium in control of mental disorders and promotes mental alertness.

SELENIUM: The new "miracle mineral". A recent six-month study at the University of Arizona on Prostate Cancer resulted in a 50% reduction in cancer proliferation using Selenium. Another recent study from Indiana University Cancer Center has explored the theory that Selenium activates an important tumor-suppressing gene called "p53". Scientists estimate that the p53 gene is mutated in as much as 70% of all cancers. In experiments performed on human lung cancer cells, the Selenium not only activated the p53 protein, but also protected cells containing p53. Based on these findings, the researchers speculate that Selenium therapy may act as a Cancer preventative by enhancing the p53 genes in the body. In addition to its excellent cancer-fighting abilities, many studies have shown that Selenium's antioxidant properties may also fight autoimmune disorders and help increase insulin efficiency.

VITAMIN C: One of the prime antioxidants to protect the body from damage from "free radicals". High levels of Vitamin C have been found to be anti-inflammatory, anti-cancer, immune system boosting. Stimulates the enzyme Superoxide Dismutase (S.O.D.) and helps with all bone formation.

BLACK STRAP MOLASSES: A high source of the meg-B Vitamins and helps Calcium convert into bone, generates new hair, skin and nail formation.

HONEY: Mother Nature's cure-all and used here for natural flavoring.

APPLE CIDER VINEGAR: Very high in Potassium and also a superb, all-natural food preservative.
