

NEW, SUPER-UPGRADED RESPIRATORY/LUNG HEALTH FORMULA

This Is Like Having a 3rd Lung!!! Breath Deeply, Strongly, Fill Your Lungs To Full Capacity!!! Fights Bronchial/Asthmatic/Shallow Breathing Problems!!! Relieves Allergies and a Tremendous Boost To Fighting Nicotine/Smoking Addiction!!! Customers Say: "I Can't Breathe Without It!"

Medical researchers tell us some frightening statistics: old fashioned Asthma has exploded into a terrible epidemic in the past ten years—increasing by over 50% in the Western world. We're suffocating to death. Pollution from automobiles, gas emissions from factories and cigarette smoke are the reasons. Combine that with an impaired immune system (which most people suffer from to some degree) and allergies that affect breathing and you can understand why people are struggling to get a good deep breath to stay alive. This remarkable formula, super-upgraded with the very latest nutraceutical ingredients, uses the wisdom of the ancient Chinese materia medica and Ayurvedic (Indian medicine) knowledge to literally create "a 3rd lung" within the body. The lungs are cleared of mucous and phlegm, delicate tissues are "spring cleaned" and rejuvenated. Rare herbs that oxygenate the blood are also used along with immune-boosting compounds and adaptogenic herbs to also help fight nicotine addiction. For anyone suffering from any form of breathing disability, this formula will be a true life saving addition to their daily regimen.

INGREDIENTS: Ophiopogon Japonicas Root; Astragalus Root; Tai Zi Shen Herb; Pinellia Ternata; Ginger Root; Tylophora Asthmatica Extract; Adhatoda Vasica Extract; Piper Longum; Licorice Root; Onion Concentrate; Gamma Oryzanol; Inosine; Co-Enzyme Q10; Ocean Source Peptide/Amino Acid Complex; Ocean Source Mineral/Trace Mineral Complex; Flax Seed Oil Powder.

OPHIOPOGON JAPONICUS: Revered for thousands of years in Chinese medicine as "the Prince of the Medical Kingdom". Used extensively for coughs and colds while helping to boost lung capacity by increasing oxygen uptake by lung tissue.

ASTRAGALUS: The prime herb in China to fight the common cold and strengthen and regulate the immune system. Has strong anti-viral qualities and also a powerful anti-inflammatory and antioxidant.

TAI ZI SHEN: An amazing herb from ancient Chinese medicine used to fight fatigue, pump fluids from the body and relive fevers. Also used as a relaxant for muscle spasms and as an anti-inflammatory. Renowned as a herb for mouth, throat and lung inflammation.

PINELLIA TERNATA: Dries out the lungs and transforms cold phlegm into harmless fluid in times of pneumonia and acute influenza. Helps to harmonize the stomach and lungs in times of disease and distress.

GINGER ROOT: How can one common plant provide so much healing? Ginger along with Garlic is the most commonly used medicinal food in the world. Used for motion sickness, morning sickness, rheumatoid arthritis, migraines and for upper respiratory coughs, bronchitis and as a galactagogue. It warms the heart and the lungs and helps with deep breathing.

TYLOPHORA ASTHMATICA: One of the most famous herbs in Ayurvedic medicine, renowned for its strong anti-inflammatory actions and powerful relief of asthmatic and allergic reactions in the lung/breathing mechanisms. Also renowned as a bronchodilator and anti-inflammatory for relief of rheumatism.

ADHATODA VASICA: A supreme herb for broad spectrum broncho-dilatory and antihistaminic effect on the lungs. It relieves coughs and colds as well as ideal for bleeding problems due to idiopathic thrombosis.

PIPER LONGUM: Also known as "Long Pepper" in Ayurvedic medicine, Piper Longum has dramatic effect on asthmatic attacks by quickly relieving pressure and constriction in the lungs and breathing mechanisms.

LICORICE ROOT: In three clinical trials on people with asthma in Japan, a concentrate of Licorice called "Saiboku-To" has been shown to reduce all symptoms of bronchitis and asthma by a ten to one margin over commonly prescribed steroid medications. The soothing action of the phytonutrients found in Licorice Root help calm the bronchial tubes and calm the lungs and emotions.

ONION CONCENTRATE: Strong anti-inflammatory action on bronchioles and helps expunge mucous and phlegm from the lung tissues.

GAMMA ORYZANOL: This extraordinary catalytic compound was first researched extensively by Japanese scientists as an extract from rice bran oil. It increased the anabolic efficiency of good digestion and energy production, basically increasing its uptake by stimulating the pituitary gland to release growth hormones into the bloodstream. Helps increase energy levels, overall stamina and oxygen uptake.

INOSINE: A nucleoside involved in the formation of purines and plays a vital role in energy metabolism and oxygen uptake. A precursor to "Adenosine", an important energy catalyst and plays many supportive roles in the body, including releasing insulin into the bloodstream and participates in oxygen synthesis. It has been suggested that ATP production in the muscles is triggered by Inosine and as such, has been used extensively by long-distance, endurance athletes to enhance oxygen delivery to the muscles and respiratory system.

COENZYME Q10: The fuel for the cell's mitochondria or "engine" to operate. Vital to deliver oxygen and energy into the bloodstream.

OCEAN SOURCE PEPTIDE/AMINO ACID COMPLEX: A gift from the Ocean. These are the building blocks of total proteins and necessary for all life processes.

MINERAL/TRACE MINERAL COMPLEX/OCEAN SOURCE: The foundation of all our formulations. Blood plasma and purified ocean water minerals are identical. These minerals are in a special, dry form to give the body all the "life-generating" elements necessary to fight all disease and maintain life. Particularly high Magnesium, the "mother mineral".

FLAX SEED OIL/POWDER: Rich source of essential Omega-3 fatty acids which in turn are necessary for all nervous system health and generation of new myelin sheath protection of the nerves.
